About Us

Our company was founded in 1996, and started its long relationship with video in 2003. Over the years we've provided technology and development services for a wide range of customers from industries such as broadcast television monitoring, IPTV, digital signage, exercise equipment, mobile technology, retail applications sold with hardware.

We work closely with our customers to help build custom solutions, providing a wide range of services, from the architecture and design, through to the implementation and deployment. Please use the 'Contact Us' link at the bottom of the page to find out more.

Got something you'd like to talk with us about?

If you're interested in working together on a project, or would like to talk to us about our applications, send us an email and we will get back to you as soon as possible!
