

How to solve the problem of opening the tray DVD PHILIPS DVDR3455H
Status BLOCKED

1. Open the DVD cover removing seven screws:

2. Remove four screws and DVD player, after the power cord from the data:

3. Remove the front of the reader-a-catching:

4. Após, retire o leitor de dentro do aparelho:

5. Remove the two screws at the top of the player:

6. Pull the tray and observe the black belt:

7. Remove black belt and replace with new one. Note that the former is removed and, therefore, has several grooves that causes the engine to fail:

8. Upon replacement close the lid and tighten the two screws above:

9. Put the DVD back and power connectors and data:

10. With the tray open, put back the cover:

11. Close the tray:

12. Put back the screws:

13. Close the cover and put back the screws:

That's it. Any doubts, ask me: lafm@monfardini.com
